Lödige Systems and HERMES partner to deliver Lufthansa Consulting and SCSC a fully integrated solution

HERMES have been selected by Lödige Systems to supply the ground handling IT function for SCSC's Saigon based green field site, to be delivered by Loedige in 2010.

This venture will see Lödige and HERMES joining forces to provide a world class ground handling solution, resulting in an efficient, modern warehouse with the capacity to manage the expanding market in Southeast Asia.

With Lufthansa Consulting defining the processes and procedures for SCSC, this contemporary new warehouse will be in a position to achieve working practices of the highest level. Benefitting from Lödige's extensive ground handling knowledge and the vast functionality of the HERMES system, SCSC will enjoy the rewards of an exacting and robust IT solution. As the progression of the build draws closer the teams are working together to bring the implementation plans to fruition for this exciting new facility.

"Ensuring a seamless solution was paramount in our selection of a partner for this project. Hermes extensive functionality resulted in minimal customisation, hence guaranteeing the client's tight delivery schedule."

Jeff Read, Managing Director of Lödige Systems Asia

Lödige Systems GmbH is a global leader in the design, manufacture, installation and maintenance of fully automated air cargo handling systems. The coming together of Lödige and HERMES for this project signifies the desire to deliver a holistic solution, providing SCSC with full operational control and a clear return on investment.

Managing air cargo businesses for Airlines, Ground Handlers and Airports in more than 50 cargo terminals across five continents, HERMES Logistics Technologies develops and markets the HERMES real-time air cargo handling system, which supports terminals with cargo volumes varying from 20,000 to over 1,000,000 metric tons per year.

The HERMES System delivers for your customer and business, a complete and integrated solution encompassing all physical handling, documentation and messaging requirements: Real-Time Warehousing, Service Level Profiling/Monitoring, End-User Guidance, Tariff Profiling, Analysis, Audits and Reports.
