HERMES system upgraded in Portugal's largest ground handler

The amazing runway at Funchal airport, Portugal!

Award winning handling company Groundforce Portugal part of the TAP Group, has invested in the upgrade of their system to latest version of HERMES, V4. The decision to upgrade their existing system has coincided with their alignment to the Cargo 2000 quality management program and the need to sustain and improve all levels of professional practices.

A copy of the Groundforce press release will be communicated shortly

Air cargo industry meeting on the track!

Last month HERMES entered 2 teams into the "non competitive!" go-karting race meeting in Camberley, Surrey.

After a shaky start, due to a mechanical error on the kart we eventually finished a respectable 6th & 8th position - well done guys (& girls!)
